- Microsoft Excel
- SQL (learning stage)
- Power BI (basic exposure)
- ServiceNow / ITSM platforms
- Microsoft Windows Server
- Active Directory

WORK EXPERIENCE

IT Service Desk & Systems Support Engineer – Ghana School of Law

Apr, 2026 – Present

- Manage the IT service desk queue by triaging incidents and service requests, prioritizing tickets based on impact and urgency, and ensuring timely resolution in line with SLA targets.
- Collaborate with DevOps and application teams on release management, including deployment readiness, post-release verification, and user support preparation.
- Assist in cybersecurity and audit processes by providing access logs, incident evidence, and compliance documentation for internal and external audits.
- Coordinate and manage P1/P2 incidents, including escalation, stakeholder communication, and post-incident reporting to ensure minimal business disruption.
- Monitor service performance against SLAs, proactively identifying risks, tracking aged tickets, and driving resolution to maintain service quality standards.
- Provide application support by performing daily system checks, resolving user issues, documenting fixes, and maintaining known error logs and support runbooks.
- Act as a key liaison between internal teams and vendors by tracking vendor tickets, escalating delays, and ensuring timely issue resolution.
- Manage user access requests, ensuring proper tracking, follow-ups, and compliance with access control and audit requirements.

- Maintain and update the IT asset register, tracking asset lifecycle (assignment, movement, return, and exceptions) to support governance and audit readiness.
- Lead problem management activities by analyzing recurring incidents, identifying root causes, and implementing preventive measures to improve service stability.
- Develop and maintain knowledge base articles, FAQs, and support documentation to improve first-contact resolution and team efficiency.
- Support user communication and stakeholder engagement, providing timely updates on incidents, outages, planned changes, and service restoration.
- Support user training and adoption initiatives, creating guides and assisting end-users in effectively using systems and applications.

End User Support Officer - Consolidated Bank Ghana Ltd, Airport-Accra. Sept, 2025 – Mar, 2026

- Participated in enterprise-wide Windows 10 to Windows 11 migration project
- Edited, Updated and Deployed group policies.
- Supported Windows Server setup including domain configuration and replication for redundancy
- Deployed and configured end-user systems, reducing onboarding setup time by 20%
- Support and troubleshoot core banking systems such as T24, gaining insight into transaction processing and banking operational workflows. Guide end-users on bank software and systems use.
- Document system incidents, resolutions, and operational processes to improve knowledge sharing and support audit traceability.
- Assists an average of 50 users per day with all Service Management related issues.
- Collaborate with the service desk and IT teams to escalate complex issues.
- Gaining an understanding of the regulatory requirements that govern IT operations in a banking environment, such as GDPR or PCI-DSS.
- Managing and reporting on IT assets, such as computers, servers, and networking equipment.
- Documented incidents and resolutions to improve service desk efficiency and audit traceability.
- Analyze service desk data and recurring incidents to identify trends and operational improvement opportunities
- Maintain asset and configuration records for IT systems to support governance and accountability.
- Support IT teams in ensuring adherence to internal policies and regulatory requirements within the banking environment.

- Assist in verifying system configurations and operational procedures to ensure compliance with internal IT policies.
- Exposure to banking regulatory environments and IT control requirements supporting secure financial operations.
- Administered Active Directory environment including user account management & OU structuring.
- Supported backup processes and basic disaster recovery procedures
- Assisted in network troubleshooting involving LAN connectivity and user access issues
- Provided support for email systems and user account configurations.
- User account setup and email configuration.
- Troubleshooting Outlook and user access issues.

National Service, End User Support, Consolidated Bank Ghana Ltd, Airport-Accra. Oct. 2024 – Aug.2025

- Log, track, and resolve service requests.
- Deploy, set up, and replace hardware as needed.
- Guide end-users on bank software and systems use.
- Assists with the configuration of new computers for staff.
- Document IT issues and solutions for better knowledge sharing.
- Assists with all Service Management related issues.
- Collaborate with the service desk and IT teams to escalate complex issues.
- Participate in IT projects, including system upgrades and process improvements.
- Stay updated with technological trends and suggest operational enhancements.

Internship, Universal Merchant Bank, Airport-Accra.

Oct. 2023 – Dec. 2023

- Managing and configuring workstations
- Providing technical support to staff
- Assisting with hardware and software installations.
- Learning to manage and prioritize IT support tickets, ensuring timely resolution of issues

PROJECTS

Active Directory Lab Environment

- Designed and implemented a domain environment with OU structure and role-based access control
- Configured Group Policy Objects (GPOs) for security enforcement (password policies, desktop restrictions)
- Implemented DNS and file share permissions for departmental access control
- Simulated enterprise IT environment for administration and policy management

TRAININGS

Microsoft Applied Skills: Administer Active Directory Domain Services	Mar, 2026
Security Operations Centre (SOC), Coursera – Cisco	Jan, 2026
Process Data from Dirty to Clean, Coursera – GOOGLE	Aug. 2024
Introduction to Networking and Storage, Coursera – IBM	July. 2024
Introduction to Cloud Computing, Coursera – IBM	July. 2024
Create Charts and Dashboards Using Microsoft Excel - Coursera	July. 2024
Introduction to Data Analysis using Microsoft Excel – Coursera	Aug. 2023

DATA ANALYTICS EXPERIENCE

- Performed data cleaning and transformation using Excel during coursework and training programs.
- Built Excel dashboards to analyze datasets and present insights using charts and pivot tables.
- Applied statistical concepts such as trend analysis and basic anomaly detection in data analysis exercises.
